MMPI-2

Motivation

VRIN Consistency Across Entire Test

Criteria		**Maximizing Settings**		
		Percentiles		
VRIN	16	50	84	93	99
		Raw Scores		
Sample				
	0	4	7		
Normal Individuals				9	12
	2	5	8		
Clinical Patients				9	12
	3	7	11		
Criminal Psychiatric				14	18
	3	6	9		
Death Row Evaluations				10	15
	3	6	9		
Personal Injury Plaintiffs				10	13

1. Most VRIN raw scores lie between 10 and 12.

2. Psychopathology does not increase inconsistency.
