

Plate I

“Butterfly”

F- Only

Seen on the upper third or only on the lower two thirds of the plate; omitting the rest of the plate. The person is unable to clearly point out the blot area covered by the image. The outline of the image is vague and unclear.

Thinking is vague, inexact, and unproductive. Cerebral dysfunction and schizophrenia is suggested.

(Piotrowski 1979, pp. 113-114)
