

## Clinical Scale Elevations

Scale(s) 0 (Sie)

T-score \$ 70

Elevations on the present Scale(s), taking race, gender, age, education, marital and employment status into consideration for the corresponding group's data indicate any or all of these clinical features could be present in this person's behavior and history:

They prefer their own company to that of others. Confrontations with other people force them to withdraw. They are generally uncomfortable and even fearful of people they do not know well. Trust builds slowly, if at all, for them. They are shy people who do not seek out or like the limelight. They prefer to work alone. They will not go to public events or attend public meetings if given the opportunity.

They are unusually quiet persons. They can stand long silences and may even like it. They find it hard to start a conversation even with people they know well. They dress conservatively. They do not like to attract attention to themselves.
