

Clinical Scale Elevations

Scale(s) 7 (Pt)

T-score 60-69

Elevations on the present Scale(s), taking race, gender, age, education, marital and employment status into consideration for the corresponding group's data indicate any or all of these clinical features could be present in this person's behavior and history:

They have a low threshold for anxiety. They are methodical, punctual, and organized. They are productive, hard working persons. They are sensitive to the moods and feelings of others. They do not wish to give offense. They follow the rules. They habitually drive at or very near the speed limit. They may not be particularly original in their approach to problems, but once they have mastered a task, they perform it unerringly and without complaints. They prefer routine, changeless futures, and the predictable. They have a high tolerance for boredom.
